You Shook me all Night long   Version 180723

[Verse 1]
```
          C                                  F
She was a fast machine, she kept her motor clean
           G                      C
She was the best damn woman that I ever seen
           C                          F
She had the sightless eyes, telling me no lies
G                                 C
Knockin' me out with those American thighs

         C                                F
Taking more than her share, had me fighting for air,
     G                          C
She told me to come, but I was already there
            C                          F
'Cause the walls start shaking, the earth was quaking
     G
My mind was aching, and we were making it
```

[Chorus]
```
     C              F    C     G        F   C
And you shook me all night long
          C                 F    C     G        F   C
Yeah, you shook me all night long
```

[Verse 2]
```
         C                                F
Working double time on the seduction line
         G                              C
She was one of a kind, she's just mine, all mine
         C                      F
Wanted no applause, just another course
         G                  C
Made a meal out of me and come back for more
         C                          F
Had to cool me down to take a-nother round,
           G                            C
Now I'm back in the ring to take a-nother swing
              C                           F
'Cause the walls were shaking, the earth was quaking
      G
My mind was aching, and we were making it
```

[Chorus]
```
     C              F    C     G        F   C
And you shook me all night long
          C              F    C     G          F          C
Yeah, you shook me all night long  And knocked me out
           C              F    C     G        F          C
I said you shook me all night long     You had me shakin'
     C              F    C     G
and you shook me all night long
G                                 G
       Yeah, you shook me    Well, you took me
```
